

Face it!

There *is* a hearing device
you'll want to wear

Mr. Gilson, Canada

Mrs. Vermeulen, The Netherlands

Mr. Magnusson, Sweden

Mrs. Barriault, UK

No more awkward moments!

Delta is not a traditional hearing aid

Engineered to improve your hearing in ways you can only imagine, Delta has already won its first prestigious design award - and now it's winning the hearts of hearing aid users all over the world. Read on to hear what some of them have to say.

Like lots of people

...you've probably experienced those awkward moments where you smile and nod, even though you've lost the thread of the conversation. Delta is specifically designed to provide the clarity you've been missing - whether it's in a meeting, at the office or at home around the dinner table.

With Delta, you can feel confident that you won't miss a thing when being around family, friends or colleagues.

Mrs. Matsuhashii, Japan

"The best thing about Delta is that you can be part of daily life again. With Delta, I can hear speech - just like other people!!"

Mr. Gilson, Canada

"I'd known I needed a hearing aid for a number of years, but didn't want a clunky traditional hearing aid that made me feel old."

Enjoy your freedom with Delta

Inside Delta

... are the most sophisticated sound processing technologies available, from advanced noise management to voice detection systems. Artificial Intelligence makes thousands of subtle digital adjustments every second, reducing noise and enhancing speech, leaving you totally free to enjoy any listening experience.

Delta's "high-tech", triangular design and virtually invisible sound wire make the whole device amazingly discreet.

Delta is all about helping you get on with your active life without you even noticing that you're wearing it. Simply put it on, turn it on and enjoy. In the situations that matter, you won't really know how much it's helping – until you take it off!

Delta's unique, triangular shape is designed to fit perfectly and totally discreetly behind the ear.

A fusion of style and performance

21st century design

Dramatically different from any previous design concept, Delta propels hearing devices into the 21st century and sets a new standard for aesthetics. Delta's sporty lines and broad range of finishes inspire so much confidence that it may well inspire others to follow your lead! Pleasing to the eye and smooth to the touch, Delta is the epitome of simplicity – so cleverly conceived that it seems rather a shame to have to wear it behind your ear!

You can explore the technologies and the benefits of Delta in more detail on Oticon's website: www.my-delta.com.

Specifically designed to sit comfortably behind your ear, Delta blends in beautifully with your skin and hair, but demands attention when in the palm of your hand.

Ms. Hogan, UK

"It's so amazing now, to hear birdsong, the rain, or my own heels clicking along a pavement. I could never have worn one of the big, old-fashioned hearing aids. You can hardly see the Delta!"

Make it uniquely yours

Which Delta are you?

With Delta, you can look good and feel great, all day long. Delta is worn behind the ear – and it will stay hidden if you want it that way. But revolutionary concepts deserve to be shown off – at least once in a while...

Delta promises maximum flexibility – even in colours. The range of finishes spans everything from hair, skin tone and metallic colours to smart and sporty patterns. So there will always be one to reflect *your* personality.

"It looks great and modern. It matches beautifully with my glasses and, due to that thin tube, it is nearly invisible. I only get to hear enthusiastic remarks when I show my hearing solution. My family and friends are so surprised when I show them my Deltas."

Which Delta reflects *your* personality?

"Delta is so easy to put on. You just place it in the canal and put it behind the ear, and that's it."

Mr. Magnusson, Sweden

"I love the size, I love the style and I love dressing up. I keep forgetting the other great part – that I can actually hear!"

Mrs. McIntyre, USA

"Delta provides the clarity I was missing and they have greatly enhanced the quality of my life. I wish this technology had been available five years ago."

Mrs. Moira, Australia

"I can not only vouch for its good looks and how comfortable it is – I can also vouch for the difference it is making to my hearing. It is brilliant!"

Mr. Bachler, New Zealand

Delta brings you quality of life

Taking good care of your hearing

...is one of the most important things you can do to keep on feeling good about yourself. Just like the people in this leaflet have experienced, the advantages in Delta are evident as soon as you try it on.

Delta brings you every advantage

- "Everyday life with my spouse has improved."
- "I'm able to socialize and take proper part in conversations."
- "I can now fully communicate with my nine grandkids."
- "Delta enables me to participate in meetings again."
- "I feel a renewed sense of normalcy."
- "It's fun to wear it."
- "It brings me so much more quality of life."
- "It has given me back my sense of professionalism."
- "I feel safer wearing the Delta."
- "My Deltas help me communicate with the world again."
- "I like having an immaculate appearance, and Delta is perfect for that."
- "Everything seems to be easier."

Delta has already changed the lives of tens of thousands of people. To become part of this experience, try Delta for yourself.

People first

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
